

Devin Teichrow, MSc

Irvine, California | devinteichrow@gmail.com

[LinkedIn](#) | [Online CV](#)

Research profile

Epidemiologist and clinical research specialist with an MS in Epidemiology from UCLA and experience spanning neuroepidemiology, migraine, ADRD and cognitive aging, clinical trial data management, environmental epidemiology, health-services research, and public science communication. Brings applied quantitative analysis, protocol and IRB support, participant-facing research operations, manuscript and abstract writing, and clear translation of complex findings for clinical, research, and public audiences.

Professional experience

Assistant Specialist

Neuroinformatics Lab, University of California, Irvine

2025 - 2026 | Irvine, CA

- Supported migraine, headache, digital cognitive testing, ecological momentary assessment, Alzheimer disease, and dementia-related research as an epidemiology and biostatistics analyst in Ali Ezzati, MD's Neuroinformatics Lab.
- Analyzed real-world migraine and cognition data in R and Python, producing regression models, marginal-means estimates, g-method analyses, cohort summaries, manuscript-ready tables, figures, and investigator-facing reports.
- Contributed analyses to four American Headache Society abstracts and multiple migraine manuscripts, including a first-author pharmacoepidemiology manuscript on real-world acute prescription migraine therapy outcomes.
- Supported longitudinal cohort development, recruitment, progress tracking, data-quality review, and documentation for the Migraine and Cognition in Daily Life Study, including two completed recruitment phases.
- Drafted and maintained protocols, IRB-related materials, consent and study-primer language, participant education, lab websites, research-output records, and public-facing UCI MIND communication.
- Developed and presented "Digital Dementia: Is Technology Making Us Forgetful?" for the Alzheimer's Orange County Brain Health Conference, translating cognitive-aging evidence for public and professional audiences.

Clinical Research Data Manager

Hematology/Oncology, UCLA Health

November 2024 - February 2025 | Los Angeles, CA

- Managed data collection, cleaning, maintenance, query resolution, quality assurance, and monitoring documentation for antifungal rezafungin clinical trials in bone marrow transplant patients.
- Produced data-quality summaries, visualizations, and query-resolution materials for clinical-team review while supporting FDA, IRB, GCP, and study-protocol requirements.
- Designed and maintained secure study databases and standardized data-management workflows to improve consistency, auditability, and analysis readiness.

Professional experience, continued

Food Rx and Related Research Master's Intern

Kaiser Permanente Research and Evaluation

June 2024 - November 2024 | Pasadena, CA

- Supported applied population-health and health-services research through data preparation, statistical analysis, project planning, reporting, and dissemination.
- Prepared analyses, manuscript material, figures, presentations, and collaborator-facing summaries for research on nutrition, weight management, restaurant portions, and cardiovascular outcomes.
- Developed intervention-facing nutrition materials and a dissemination-focused cookbook, including nutrition analysis, layout planning, and plain-language health communication.

Graduate Student Researcher

Ritz Environmental Epidemiology Lab, UCLA

September 2022 - June 2024 | Los Angeles, CA

- Completed an epidemiology master's thesis on maternal exposure to airport-related particulate matter and risk of childhood cerebral palsy and epilepsy using a dataset with more than 200,000 participants and 50 variables.
- Cleaned and analyzed data in R using logistic regression, sensitivity analyses, and visualization; supported literature review, protocol documentation, IRB-related form revisions, staff training, and onboarding.
- Supported Parkinson's Environment and Genes research through participant interviews, recruitment, outreach, and data entry; completed MoCA certification/training and administered cognitive assessments in Parkinson's disease research.

Undergraduate Research Assistant

UC Davis Alzheimer's Research Center

March 2021 - June 2022 | Davis, CA

- Supported longitudinal dementia-prevention research involving diet and exercise interventions, cognitive-health outcomes, older-adult participants, REDCap data entry, and participant-facing documentation.
- Conducted strength and flexibility assessments in retirement-community settings and maintained real-time study records.

Undergraduate Student Researcher and Thesis Advisee

Personality, Self, and Emotion Lab, UC Davis

September 2020 - June 2022 | Davis, CA

- Used R to estimate latent growth-curve and structural-equation models for longitudinal developmental psychology research; contributed to a published study and completed an honors thesis on personality development and childhood cognitive ability.

Education

Master of Science, Epidemiology

UCLA Fielding School of Public Health | June 2024

Thesis: Maternal particulate-matter exposure from airport-related air pollution and risk of childhood cerebral palsy and epilepsy.

Bachelor of Arts, Psychology

University of California, Davis | June 2022

Undergraduate Research Award, Department of Psychology; honors thesis on longitudinal personality development and childhood cognitive ability.

Methods and research skills

Study design and epidemiologic methods; regression modeling; longitudinal data analysis; cohort characterization; sensitivity analyses; g-methods; marginal means; literature review; PubMed and Embase searching; clinical research operations; clinical data management; IRB and protocol materials; GCP/FDA-aware documentation; participant recruitment; REDCap; R; Python; SAS; SQL; Stata; Microsoft Access; Qualtrics; Excel; PowerPoint; Word.

Scientific, educational, and public communication

- The Edge of Epidemiology: Founder and writer of an independent public-science publication on epidemiology, public health, disease ecology, infectious disease history, and the historical roots of modern health systems. [View work](#)
- UCI MIND: Public-facing ADRD research translation, including "Personality Before Memory? When Subtle Changes Signal the Earliest Stages of Dementia." [View work](#)
- Alzheimer's Orange County: Developed and presented "Digital Dementia: Is Technology Making Us Forgetful?" on dementia, technology, brain health, cognitive aging, and research literacy.
- The Age of Exploration: Published "Slow collapse: How Eurasian diseases devastated the Americas" and developed interactive historical epidemiology maps, including the Norse Travels Health Map and American Revolution Health Atlas. [View work](#)
